TSI Partners webpage

In searches with keywords related to securitisation and asset-based finance instruments, TSI's web presence consistently appears in top search results on Google and other search engines. This underscores how often and intensively our website is accessed. And when we receive requests from market participants for suitable contacts at leading banks, law firms, rating agencies and other service providers, we regularly refer to the contact persons shown on our TSI Partners webpage.

You have the opportunity to present your company on a webpage of your own that is integrated into TSI's website and was designed specifically for the field of securitisation and asset-based finance. There you can provide the following detailed information about your company:

TSI partner networking

TSI partners come from various areas of the German securitisation and asset-based finance market: banks, consultancy firms, service providers, law firms, rating agencies and associations. All of them have expertise and years of experience in this market segment and share an interest in its further development.

TSI provides a platform to enable technical exchange, networking and the development of a community around these topics.

TSI partners receive an invitation to our regular TSI Networking Event and to further events such as our exclusive wine evenings.

TSI Insights

One of TSI’s key tasks is to promote the securitisation market in Germany and Europe. We contribute to gradually improving the regulatory, tax and legal environment through active advocacy. Securitisation forms the bridge between bank-based corporate finance and the capital markets, and this important function is again being recognised by business and policymakers in Germany and Europe – an important prerequisite for convincing stakeholders of how important the topic of ABS is for Germany’s economic development.

As a **TSI partner** you will automatically receive our newsletter entitled ‘TSI Insights’.

In it we inform you once a month on current news on regulatory and legal topics, TSI events and the TSI Congress.
