Calculation of Credit Enhancement:

Driver Four's Credit Enhancement consists of the items listed above calculated on the initial Discounted Principal Balance as of the Cut Off day. The result provides an absolute value which will be applied to the (amortized) Discounted Principal Balance as of the end of the monthly period. This process is continuing until a Credit enhancement of 9,10% of class A (5,20% of Class B) has been reached.

The Class B Notes benefit from the Subordinated Loan, the Overcollateralisation and the Cash Collateral Account.

- The transaction starts with sequential amortisation and therefore initially only the Class A Notes will receive principal payments
- The transaction switches into pro rata amortisation once an overcollateralisation percentage (i.e. credit enhancement excluding cash collateral) of 9,10% for the Class A Notes and 5,20% for the Class B Notes has been reached
- The amortisation will revert to sequential in case the total amount of notes outstanding falls below 10% of the initial notes outstanding

Performance Triggers

A Targeted Note Balance was implemented to assure on a monthly basis that no cash is paid to lower steps in the waterfall unless there is sufficient overcollateralization to support the notes.

The performance trigger in form of a credit enhancement increase condition will be activated when the cumulative Net Loss Ratio exceeds the defined limits. In this case the overcollateralization will be increased accordingly.
